General Comments

Small field DDCs 20mmx20mm and 30mmx30mm were diode measurements, those were ignored in the fit. Note that small-field OF- and DDC-measurements used a shielded diode (PTW DiodeP), while PTW recommends using the unshielded version (DiodeE) for such measurements.

Profiles

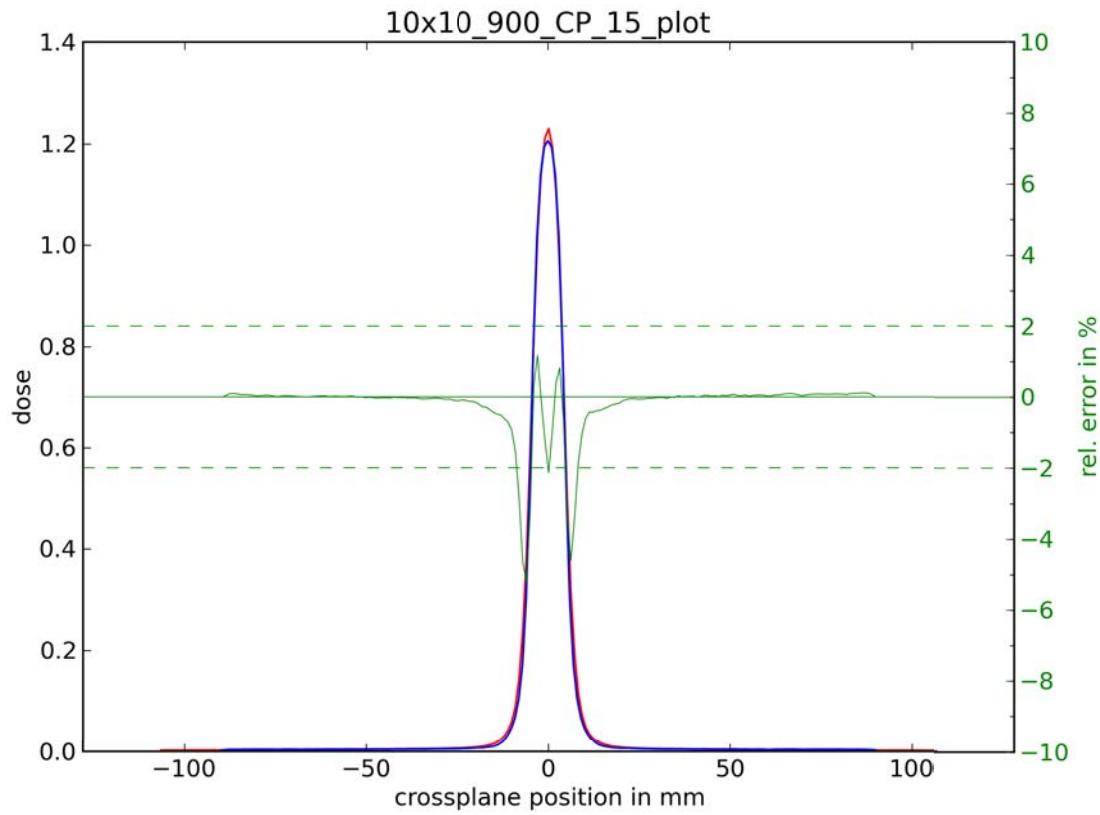

Comment for cross profiles:

A wrong field size setting was used for the 40mmx40mm INPLANE-measurement (measured profiles too wide).
